Document type	**SOP (Standard Operating Procedure)**				
Intended for	Chair, Secretary and members of the Local Bioethics Committee of HemCenter LLP				
Nomenclature code	I-05	**Number**	Issl-3-12	**Revision**	**001**
Title	**INTERIM MONITORING**				
Developed by	Business Development Director		Volyanskaya N.V.		15 May 2023
	Project Manager		Graf M.A.		15 May 2023
Agreed by	Medical Director		Klodzinskiy A.A.		29 May 2023
	Head of Patient Support and Internal Review Service		Demkina O.V.		29 May 2023
Approved	By Order of the Director General of HemCenter LLP No. I-02-52 dated 2 June 2023				
Implemented					
Revision policy	Upon changes in regulatory legal acts and/or operational need				

Purpose

To establish the procedure for submitting an interim report on studies previously approved by the Local Bioethics Committee of HemCenter LLP (LEC)

Responsibilities

Members of the Local Bioethics Committee of HemCenter LLP (LEC) are responsible for the timely review of interim study reports

Contents

No. Terms and definitions

a. **Biological equivalence** (hereinafter – bioequivalence) – the absence of significant differences in the rate and extent to which the active substance or active moiety of pharmaceutical equivalents or pharmaceutical alternatives becomes available at the site of its action when administered at the same molar dose under similar conditions in an appropriately designed study

a. **Investigator's Brochure** - a compilation of the results of the clinical and preclinical (non-clinical) study of the investigational product that are relevant to its study in humans.

b. **State expert organization in the field of circulation of medicinal products and medical devices** (hereinafter – the expert organization) – a state monopoly entity carrying out production and economic activities in the field of healthcare to ensure the safety, efficacy and quality of medicinal products and medical devices.

c. **Study design** - the overall plan of the study, a description of the manner in which the study is conducted depending on the selection and formation of groups of study subjects and the blinding (masking) of data.

d. **Contract** - a dated and signed agreement between two or more parties that sets out arrangements concerning the allocation of the scope of work and responsibilities in the conduct of a study and, where necessary, financial matters. The study protocol should serve as the basis of the contract.

e. **Case report form** - a document on paper, electronic or optical media designed to record all the information required by the protocol to be reported to the sponsor on each study subject.

f. **Interventional study** – a study involving a human as a study subject, in which the investigator-physician, on the basis of an interventional clinical trial protocol that complies with the procedure for conducting clinical trials, assigns a specific intervention to the study subjects.

g. **Informed consent** - a procedure by which a study subject or his or her legal representative voluntarily confirms consent to participate in a particular study after having been informed of all aspects of the study that are relevant to the decision. Written informed consent is documented using the form approved by the authorized body.

h. **Bioequivalence study** – a comparative study of bioavailability aimed at establishing pharmacokinetic equivalence between the test product and the comparator product.

i. **Investigator** - an individual responsible for the conduct of a clinical trial at the clinical sites of HemCenter LLP, a member of the research team.

Where a study is conducted at a clinical site by a group of investigators, a **Principal Investigator** - the head of the research team - is designated. The Principal Investigator is selected by the members of the Clinical Project Office and approved by the Director General of HemCenter LLP. The Order appointing the members of the research team (investigators) is approved by the directors of the branches and the division of HemCenter LLP

j. **Investigational product** - a pharmaceutical form of an active substance or placebo being tested or used as a control in a clinical trial, including an authorised medicinal product where it is used in a way different from the approved one, or when used for a new indication or to gain further information about an approved indication

k. **Ethics committee** - a consultative and advisory body established at the national level (the Central Bioethics Commission) and at the level of a medical organization, composed of specialists in healthcare and science and representatives of public organizations, which protects the rights, safety and well-being of study subjects and investigators and carries out the ethical and moral-legal assessment of clinical trial materials.

Local Bioethics Committee (LEC) of HemCenter LLP - an independent body that protects the rights, safety and well-being of patients, trial subjects, investigators and healthcare workers and carries out the ethical and moral-legal assessment of materials related to medical and scientific activities.

l. **Clinical site** - a healthcare organization that conducts clinical trials.

m. **Clinical trial** - a study involving a human as a subject, conducted to identify or confirm the safety and efficacy of means, methods and technologies for the prevention, diagnosis and treatment of diseases.

n. **Contract research organization** (CRO, Contract research organization) — an individual/organization that, under a contract with the sponsor, performs one or more of the sponsor's functions related to the conduct of a clinical trial.

o. **Confidentiality** - keeping information belonging to the sponsor, or information that makes it possible to identify a study subject, secret from unauthorized persons. Materials containing restricted information.

p. **Medicinal product** – a product that is or contains a substance or combination of substances that comes into contact with the human body and is intended for the treatment or prevention of human diseases, or for restoring, correcting or modifying human physiological functions by exerting a pharmacological, immunological or metabolic action, or for the diagnosis of human diseases and conditions.

q. **Study materials** – a set of documents submitted by the sponsor of clinical trials to the clinical site, which includes the authorization of the authorized body in the field of healthcare of the Republic of Kazakhstan to conduct the given clinical trial and to designate those responsible for its conduct in accordance with the procedure approved in the Republic of Kazakhstan; the clinical trial protocol; the Investigator's Brochure; explanatory documents on the specifics of the use of new medical technologies (where used) and other documents, as well as the draft clinical trial contract

r. **Medical record** — a medical document in which the attending physicians record the patient's medical history (inpatient or outpatient) and the treatment prescribed to the patient, in electronic or paper form.

s. **Multicenter clinical trial** - a clinical trial conducted according to a single protocol at more than one study center and by more than one investigator.

t. **Clinical trial monitor** – an individual appointed by the sponsor or contract research organization who works together with the coordinating investigator or coordinating committee and oversees the conduct of the clinical

trial in accordance with the protocol, assesses the degree of its implementation, and assists the investigator in the analysis, interpretation and extrapolation of data.

u. **Monitoring** - the procedure of overseeing the progress of a biomedical study and ensuring that it is conducted, the data are collected and the study results are reported in accordance with the protocol, plan, programme, standard operating procedures and Good Clinical Practice.

v. **Good Clinical Practice (GCP)** - a standard for the design, organization, conduct, monitoring, auditing and recording of clinical trials, as well as for the analysis and reporting of their results, that provides assurance that the data obtained and the results reported are credible and accurate, and that the rights, health and confidentiality of study subjects are protected.

w. **Adverse incident** – any malfunction and/or deterioration in the characteristics or performance of a medical device, or any inadequacy or inaccuracy in the accompanying information (documentation) for a medical device, or side effects or an adverse reaction not specified in the instructions for use or the operating manual, which directly or indirectly led, or might have led, to the death or serious deterioration in the state of health of users or third parties.

x. **Adverse event** – any untoward change in the state of health of a patient or clinical trial (study) subject administered a medicinal (investigational) product, regardless of whether it has a causal relationship with its use.

y. **Impartial witness** - an individual not involved in the conduct of the clinical trial, - who assists the study subject, including by reading out the written materials supplied to him or her.

z. **Non-interventional clinical trial** – a study that is conducted after the state registration of a medicinal product or medical device and is prescribed within the framework of medical practice.

aa. **Original medical records** – see the term "source documents".

bb **Essential documents** – documents which collectively or individually permit evaluation of the conduct of a study and the quality of the data produced. These documents serve to demonstrate the compliance of the investigator, sponsor and monitor with the standards of Good Clinical Practice (GCP) and with regulatory requirements.

cc. **Clinical trial (study) report** - a document containing a description of a clinical trial of a therapeutic, prophylactic or diagnostic agent involving a human as a subject, which integrates the clinical and statistical descriptions, the presentation of data and their analysis; and long-term effects, including adverse reactions to the investigational medicinal product or medical device.

dd **Source documents** – all information contained in original medical records and certified copies thereof that describes the results of clinical observations, examinations and other activities and makes it possible to reconstruct and evaluate the course of the clinical trial. Source data are contained in source documents (originals or certified copies thereof).

ee. **Comparator product** – an authorised medicinal product or placebo used as a control in a clinical trial.

ff. **Clinical trial protocol** - a document that describes the objectives, design, methodology, statistical considerations and organization of a study.

gg. **Serious adverse event and/or serious adverse reaction** - an adverse reaction that results in death, is life-threatening, requires hospitalization of the patient or prolongation of existing hospitalization, results in persistent or significant incapacity or disability, or in congenital anomalies or birth defects, or requires medical intervention to prevent the development of the listed conditions

hh **Protocol synopsis** - a brief summary of the clinical trial protocol.

ii. **Clinical trial sponsor** – an individual or legal entity responsible for the initiation, organization and financing of a clinical trial.

jj. **Standard operating procedures** – detailed written instructions designed to achieve uniformity in the performance of a specific activity.

kk. **Study subject** - an individual who participates in a clinical trial either as part of the group receiving the investigational product or as part of the control group.

ll. **Authorized body** in the field of healthcare – the Ministry of Health of the Republic of Kazakhstan.

mm **Clinical trial phase:**

the first phase of a clinical trial – the first testing of a medicinal product, conducted in healthy volunteers or, where the high toxicity of the investigational product makes it unethical to conduct the study in healthy volunteers, in patients suffering from the relevant disease, in order to establish tolerability, safety, the presence of a therapeutic effect, and pharmacokinetic and pharmacodynamic characteristics;

the second phase of a clinical trial – a study aimed at assessing the efficacy and short-term safety of the investigational medicinal product in patients with a specific disease, as well as demonstrating the clinical efficacy of the medicinal product and determining the therapeutic dose level when tested in a group of patients;

phase four of a clinical trial – a study of a medicinal product conducted after its registration and placing on the market in order to confirm its therapeutic efficacy and the strategy for its further use, as well as to obtain additional information on the range and frequency of adverse effects and on the interaction of the investigational medicinal product with other medicinal products;

phase three of a clinical trial – a study conducted in large groups of patients of various ages and with various concomitant conditions in order to examine all aspects of treatment, including assessment of the risk: benefit ratio.

No. Abbreviations

a. **IB** – Investigator's Brochure
b. **PI** – Principal Investigator
c. **RT** – research team
d. **MD** – medical device
e. **IP** – investigational product
f. **CRF** – case report form
g. **IC** – informed consent
h. **CT** – clinical trial
i. **CTC** – clinical trial coordinator
j. **LEC** – Local Bioethics Committee of HemCenter LLP
k. **MoH RK** – Ministry of Health of the Republic of Kazakhstan
l. **AE** – adverse event
m. **ED** – essential documents
n. **RK** – Republic of Kazakhstan
o. **SAR –** serious adverse reaction
p. **SAE –** serious adverse event
q. **SOP**– standard operating procedure
r. **LLP** – limited liability partnership
s. **the Center** – HemCenter LLP
t. **CBC** – Central Bioethics Commission of the Ministry of Health of the Republic of Kazakhstan
u. **ҚР ДСМ** – abbreviation used when assigning numbers to regulatory legal acts of the RK (Kazakh)
v. **CRO** – contract research organization
w. **GCP** – Good Clinical Practice
x. **ICH-GCP** – International Conference on Harmonisation, the international conference on the harmonisation of GCP
y. **CIOMS** – Council for International Organizations of Medical Sciences

z. **EMEA –** European Medicines Agency (EMA), the agency for the evaluation of medicinal products for compliance with the requirements set out in the European Pharmacopoeia

aa. **FDA –** Food and Drug Administration of the USA (United States of America)

bb **UNESCO –** United Nations Educational, Scientific and Cultural Organization, a specialised agency of the United Nations for education, science and culture.

cc. **WHO** – World Health Organization

No. Procedure

1. Each year, applicants submit for review by the LEC members an interim report on studies previously approved by the LEC (Appendix 1).

LEC members review reports on the progress of studies and on changes and additions to the study protocol and the voluntary informed consent form, and also oversee ongoing studies.

If any violations on the part of the applicant are identified in the interim report, the LEC Chair and members have the right to request additional information from the applicant.

Start and end dates

Has the study started?

If yes, state the actual start date of the study and

the clinical site

If no, state the reasons why the study has not started

When is the study planned to start

Will the study be completed?	□ yes □ no

If no, when is completion of the study planned?

If you do not expect the study to be completed,

state the reason(s)

Patient enrollment

Number	Proposed in the initial application:

Actual number enrolled to date:

Number of participants completing the Actual number participating in the

study:	study to date:

Are there any serious difficulties with the enrollment of ☐ yes

participants?	☐ no

If yes, state the reason(s)

Do you plan to increase the planned ☐ yes

enrollment of participants in the study?	☐ no

Is there any information on the withdrawal of subjects from the study?

Safety report

Have there been any serious and unexpected ☐ yes

adverse reactions and events in this ☐ no

study?

What are they related to?

Were the SAE data submitted to the LEC?	☐ yes

If no, explain the reasons for the late ☐ no

notification

Has the Annual Safety ☐ yes

Report been submitted?	☐ no

Serious breaches of the protocol or of Good Clinical Practice

Have there been any serious breaches of ☐ yes

the study protocol during the year?	☐ no

Other matters

Do you wish to inform the LEC of any other ☐ yes

events related to the study?	☐ no

Are there any ethical issues on

which additional consultation is required?

If yes, attach a separate statement with details
